

Ahmed

Full-Stack & DevOps Developer

Computer Science Student - Hogeschool Rotterdam

Delft, Netherlands

ahmad.ahmadpro3@gmail.com

github.com/ahmedbkd

linkedin.com/in/ahmedbkd

CORE SKILLS

Python

TypeScript / JavaScript

SQL & Databases

C#

Java

FRONTEND

Next.js (App Router) · React
Vue.js · Nuxt.js · Tailwind CSS
Shadcn UI · Framer Motion · Three.js

BACKEND

FastAPI · Express.js
.NET (C#) · Symfony (PHP)
REST APIs · WebSockets
JWT · OAuth2

INFRA & DEVOPS

Docker · CI/CD · Linux
Nginx · VPS provisioning
AWS EC2 · Reverse proxies
SSL · Load balancing

DATABASES

PostgreSQL · MySQL · MongoDB

OTHER

OWASP · Secure auth flows
Git · Web scraping
AI/LLM integrations · Raspberry Pi

LANGUAGES

Arabic ●●●●●
English ●●●●●
Dutch ●●●●○
Portuguese ●●○○○

PROFILE

Computer Science student and full-stack developer who’s been building real software since before university. I started freelancing early, founded a dev studio (InnoByte), and have worked across the full stack - from FastAPI backends and PostgreSQL schemas to Nginx configs and Docker deployments. I write clean code, I own my work end-to-end, and I’m comfortable in ambiguous situations where there’s no one to hand the problem to.

EXPERIENCE

Founder & Full-Stack Developer Jun 2024 – Present
InnoByte - Self-employed, Netherlands

- › Founded and operate a digital agency offering end-to-end services: custom software development, web development, business automation, conversion-focused design
- › Manage all server infrastructure: VPS provisioning, Nginx reverse proxies, Mail servers, Overall security

Software Developer (Freelance) Jul – Sep 2024
Site-Users B.V.

- › Delivered web applications and automation scripts across React, Vue, Angular, and Python stacks

Freelance Developer May – Dec 2024
Flitz-events

- › Built responsive, performant marketing sites that drove measurable conversion improvements for event campaigns

WordPress Developer - Internship Sep 2023 – Mar 2024
Flitz-events

- › Built custom WordPress templates from scratch using PHP, JS, ACF, and Elementor; site SEO improvements contributed to a **8% conversion uplift**
- › Developed embedded systems with Raspberry Pi and ESP32 using Python and C++

PROJECTS

WYSP Social Media Platform
Next.js · FastAPI · PostgreSQL · WebSockets · JWT/OAuth2

- › Full-stack social platform with posts, friend system, real-time feed, and live chat - built end-to-end, including database schema design and OAuth2 authentication

Siden Discord Bot + Web Dashboard
Nuxt · FastAPI · MongoDB · Chart.js

- › Designed and built a full-stack moderation platform for Discord servers, combining a bot with a web dashboard for server managers
- › Features included automated role assignments based on user activity, scheduled moderation tasks, and a server analytics module giving moderators insight into community dynamics
- › Project was scoped ambitiously - ultimately cancelled due to time constraints, but the full codebase remains in private GitHub repositories

National Movers - Moving Wizard
FastAPI · Vue · MySQL · Cloudflare · Tailwind CSS · Google Maps API

- › Built a full-stack moving quote tool where users plot pickup and delivery points on an interactive map.
- › Wrote a custom route algorithm on top of the Google Maps API to calculate distances and generate accurate quotes on the fly
- › Designed the entire user flow around conversion - progressive steps, clear CTAs, and minimal friction to get users from address input to confirmed quote as fast as possible
- › Backend built with FastAPI and MySQL, frontend in Vue with Tailwind CSS, deployed on Cloudflare for performance

EDUCATION

BSc Computer Science (Informatica) 2024 – Present
Hogeschool Rotterdam · 2nd Year · Propedeuse completed

MBO 4 - Software Developer 2022 – 2024
ROC Mondriaan · Graduated with Distinction · 9/10 avg · Completed 1 year early
